1. Approximately one kilogram of 0.012-millimeter enamel-coated copper wire is produced at Kabelwerk Koepenick each month. The wire is non-magnetic. It is used in small devices such as aircraft instruments, where weight and space factors must be carefully considered.

2. During the first ten days of each month (fnu) Honig brings into East Germany and delivers to Kabelwerk Koepenick, a small package of diamonds; the package is about three inches in diameter. Honig has been operating in this fashion since about August 1952.
